Dr. Walton has returned from a
vacation spent on a motor trip to
Banff and other resorts. He will
now be found, as usual, at his
office on First ave., opposite the
Town Hall.

After a Record.

When Liberal Candidate Bryan
heads the poll on Aug. 22d he will
have made a record for this prov-
incial riding, as no Liberal has, as
yet, sat for Stony Plain Constitu-
ency since the days of John Mc-
Pherson.

John McPherson, a Liberal, was
returned in 1905, on autonomy be-
ing granted the Province; John

GEORGE J. BRYAN,
The Liberal Candidate.

was re-elected in May, 1906; Con-
rad Weidenheimer, Conservative,
was elected in 1912, defeating Mc-
Pherson; Fred Lundy was elected
in 1917, the War year; Washburn
in 1921; Washburn re-elected in
1925; and Donald MacLeod in
1930.

In 1921 the contest was between
Joe Miller, Lib.; D. Brock, Ind. Far-
mer; Fred Lundy, Con., and W. M.
Washburn, UFA, the latter win-
ning the seat.

The 1925 election seen Lundy,
Washburn and 2 Liberals (Oatway
and M. McKinlay) entered in the
fray; when Moody Washburn was
re-elected.

In 1930 Washburn lost the UFA
nomination to a new man, Donald
MacLeod; at election time the en-
trants had narrowed down to 2—
Geo. J. Bryan and MacLeod, the
latter winning by a small margin.

This election the entrants are
back to the old number of four—
these being given in the order of
their nomination: George J. Bryan,
Donald MacLeod; R. C. Johnson,
and the Social Credit candidate—
W. E. Hayes.

Patrols Wanted on Highways

Speeding drivers on Alberta's
highways — always a menace to
lives and property — will be check-
ed up, if a move initiated by the
Alberta Motor Assoc. is headed by
the authorities. The need of high-
way patrols is being advocated by
the A.M.A. With a proper force of
this kind, ready at any and all
times to check the reckless driver,
serious accidents on the highways
of the Province should be reduced
to a minimum.

The Country Weekly Newspaper

"What do you think of the future of country newspapers?"

This question was asked Mr. Wright A. Patterson by a teacher of Journalism in one of the western United States state universities in the course of a conversation in which the successful efforts of big city dailies and periodicals to increase circulation in rural sections was noted, and the editorial content of these publications discussed. In answer, Mr. Patterson painted a picture of the future as he sees it.

Admitting that there is a place for the small weekly newspaper—and there is, and probably nowhere more decidedly so than on the prairies of Western Canada—the important question is: How is that position to be maintained, improved, developed; and are our Western Canadian editors alive to the situation and endeavoring to meet it? If they are, they will undoubtedly receive the public support they will so well deserve.

Both weekly newspaper publishers and the reading public will be interested in Mr. Patterson's word-picture as it is presented in a recent issue of 'The Publishers' Auxiliary'. While a bit too lengthy for complete reproduction in this column, excerpts may be given—

"There has been, within the last quarter of a century, a radical change in the people of the rural communities—the people of the towns and on the farms. Up to a quarter of a century ago, these communities were self-centred. The people seldom got beyond their local market place. It was a day's task for the farmer and his family to get as far away from home as the nearest town, possibly not more than three or four miles away. The only form of conveyance was the farm wagon, or the horse and buggy. The roads were narrow stretches of dirt that were, during portions of the year, practically impassable. From one year to another the vast majority of the rural people—the people of the towns and farms—did not get beyond their municipal lines. It was the exceptional rural family whose children went away to school. The students at universities were largely from the cities and the number attending universities was small as compared to the present time.

"Under such conditions the horizon of the rural family was extremely limited. Its members had practically no contact with the outside world and quite naturally the interests of these rural people centred about themselves and their neighbors.

"The country newspaper that catered to that local interest, that recorded the events in which the people of each community played a part, was satisfactory to the people of these communities. To this local news coverage, many editors added some general news and entertainment material and made for that time a satisfying newspaper that met very rural reader demand.

"Today conditions are radically different. The automobile and good roads have made travel possible. The day's trip now is to the city anywhere from 50 to 300 miles distant from the rural home. The World War took tens of thousands of the boys of the farm into distant training camps and associated them with boys from every section of the nation, and with every class. It sent them across the ocean into far distant lands. It widened their horizon to include practically the entire world and all classes of people and all forms of activities. It gave them a new outlook and new interests. That was 18 and 20 years ago. The farm and town boys of the World War days are now the men, the heads of families, of the rural communities of these days.

"The radio has brought the world to the rural community doorstep. It has widened the view of the people of these communities until it includes all Canada, the United States, England, France, Japan, Australia and every known point in the world.

"Go to the universities to-day and a large percentage of the students are from the towns and the cities. These young people are acquiring for themselves and taking back to the rural homes from which they come, an increased interest in national and world affairs, in history in the making, in the arts and sciences and in literature.

"As a class the rural audience of to-day is a more intelligent audience than that of the city. The people of the towns and farms have to-day a wider interest than the average individual of the city. They are in no sense provincial.

"It is such an audience the country newspaper of to-day and to-morrow must appeal to if it is to live. It must bring to them intelligent interpretations of what is happening throughout the world because it is to-day their world, and they know that its happenings may directly concern themselves. The cotton farmers of the Southern States know that happenings in far-away Japan may make or break the price they get for their cotton. They know that should the war come between Italy and Ethiopia, it might affect the regulation of the waters of the Blue Nile and so affect the export crop of the Egyptian Sudan and create a larger demand and higher price for American cotton—their cotton. The wheat farmers of Western Canada know that drought in Russia, in Argentina, in Australia, in France or many other sections of the world would certainly raise the price they would get for their product.

"The people of towns and farms have their eyes kept in touch with those national and world affairs that have a direct bearing on their lives. They expect the newspaper they buy to bring to them interpretations of such happenings. They do not want rumors and surmises, but they do want statements of fact and what such facts mean. They will buy the newspaper that gives them such information."

Weekly newspaper editors are awakening to these new conditions. They are realizing that it is quality not quantity of reading matter that is demanded, and that the demand can be met in the limited space of eight to 10 or 12-page papers, giving them room to cover the community happenings and with that interpretations of events in the nation and the world, and a reasonable amount of entertainment.

For the future, the country newspaper has a future. Such a paper will cover all the news, national and world interests of its readers and will make itself so meet the newspaper needs as to leave no necessary place for a paper from the outside. For such a paper there is a future, greater than that of the past, and the majority of the editors of country newspapers are aware of these things. The small minority that are not, or do not awaken will, in time, pass out of the picture.

New Form Of Flight

Man In Florida Has Used Wings With Success

The idea of strapping "wings" on a man was discussed in some detail by Leonardo da Vinci. At the Science Museum in South Kensington there is the original "Ornithopter" designed by Frost in 1902. It is a beautiful work but never flew. It seems now that a new form of flight has been made practicable by Clem Sohn, known as the "human bat" who only recently flew over Daytona Beach, Florida, with "wings" of his design attached to his arms and "webbed feet". The earliest dreamers who sighed for the wings of a dove could have done the same if only they had had some means of alighting safely. The parachute has made bird-like flight possible. Once the airman has thrown himself from an airplane at a suitable height he has only to fall 1,000 feet to gather a speed of 100 to 150 m.p.h. At this speed he can glide bank, turn, or execute any manoeuvre.

Empire Trade Agreements

New Deal With Canada Desired By Australian Premier

A new trade agreement with Canada embodying additional features is desired by Australia. Prime Minister Joseph A. Lyons of that Dominion said in his conference with Prime Minister R. B. Bennett of Canada. The empire trade agreements negotiated in 1932 had proved satisfactory and had brought about an increase in trade. Australia was anxious to achieve further increases and believed a revision of the present treaty in the light of experience would accomplish this. While it was true Canadian exports to Australia had increased more rapidly than Australian exports to Canada, Australia had no grievance and did not consider it hard to get the worst of the bargain.

Vimy Pilgrimage

Dominion Organizer Leaves For Europe To Complete Plans

Ben W. Allen, Dominion Organizer of the Vimy Pilgrimage which is being planned by the Canadian Legion of the British Empire Service League, sailed on the Cunard-White Star liner *Albatross* to complete arrangements for the reception and billeting of Canada's Peace Army which, at this time next year will be crossing the Atlantic en route to the Battlefields of France and Belgium.

"While the climax of the Pilgrimage will undoubtedly be the unveiling of the great Memorial on Vimy Ridge," Mr. Allen stated, "the itinerary will include visits to the Battlefields and cemeteries in the Armentières, Arras and Ypres sectors, where the Canadian Corps fought its greatest battles and Canadian citizen soldiers made their greatest contribution towards victory and peace."

On the continent, Mr. Allen will confer with the French and Belgian authorities and ex-servicemen's organizations regarding the official part of the program and will complete the arrangements for the route to be followed and the transport and lodging facilities. "We have already had indications," Mr. Allen said, "that our old allies propose to make our visit next year the occasion for joyful demonstrations of comradeship and international friendship. It will be a tremendous experience for the troops and their families."

In London, Mr. Allen will confer with officials of the British Empire Service League, the Dominion Office and the Canadian High Commission regarding the ceremonial which will be held during the four-day visit of the Pilgrims to the Empire. Other bodies interested in the arrangements for the Pilgrimage and on whom Mr. Allen will call while in Canada are the Canadian Battlefields Memorials Commission, the Imperial War Graves Commission, the Canadian Legion, the Canadian-White Star Steamship Lines.

Throughout his trip, Mr. Allen will be accompanied by Mr. J. H. Bowler, M.P., General Secretary of the Canadian Legion, Dominion Command.

Donaldson Atlantic Line

Change Of Name Is Announced By Agents

Donaldson Atlantic Line is the new name for the former Anchor-Donaldson Line, it was announced by Cunard White Star Limited, who are their agents in Canada and the United States.

"The change of name signifies the return of the Canadian-Scottish passenger service to complete control by the Donaldson interests which originally promised it," stated George D. Hubbard, deputy chief Canadian representative of Cunard White Star, in an interview at Montreal.

"The Donaldson Line itself commenced its Canadian operations in 1870 and has since then maintained continuously its Canadian operations in service between Canada and its home port of Glasgow. Its growth has also been marked by the acquisition of the old Allan Line service to South America, the development of the Montreal-Bristol Channel trade and the service from Vancouver to Great Britain."

New Gyroplane Tried Out

Will Rise Vertically And Attain Ordinary Horizontal Speeds

A newly perfected gyroplane, an aerial craft capable of rising vertically like a helicopter and attaining horizontal speeds comparable to those of ordinary aeroplanes, went through an initial trying out at Villacoublay, France.

Its propellers are placed in horizontal positions, powered by several motors.

FASHION FANCIES

964
DRAMATIC DOTS FOR FLAT SKIN FOR COUNTRY OR THE BEACH QUICKLY MADE!

By Ellen Worth
The practical playmate patterned for to-day is the "flat" thing for slapping sport and for camp wear. It favors the tailored shirtwaist lines, with that little girl air about it, that you'll love.

The suit, buttoning from neck to hem, makes it especially easy to slip into. Generous plaisted insets at the sides, lend plenty of freedom to the detachable skirt. While only dotted pique—strawberry pink on lighter pink ground—made the model pictured, there are numerous other smart and imaginative schemes for this easily made playmate.

Style No. 964 is designed for sizes 14, 16, 18 and 20 years. Size 16 requires 4 1/2 yards of British material for the entire outfit. Address mail orders to: Pattern Department, Window Newspaper Union, 175 McDerby Ave., St. Paul, Minn.

Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day, the price is 15 cents.

Use Your Head!

Times are better... why not get back to Ogden's? You no longer need deny yourself the best cigarette tobacco when it costs so little!

Get yourself a package of Ogden's Fine Cut... smoke it with "Vogue" or "Chantecler" papers... and you'll say: "Happy days are here again."

Fifty-two Poker Hands, any numbers, now accepted as a complete set.

OGDEN'S FINE CUT

Your Pipe Knows Ogden's Cut Plug

Air Routes Are Valuable

Makes Communication With All Parts Of Empire Possible

Air and Empire are closely linked. The most valuable bonds in any empire are its communications. The Romans knew that. Their roads were veins for their empire's lifeblood. But the speed of modern transport has made communications ten times more valuable. If Britons and Americans could have used railways to exchange their views in 1776 America might never have left the Empire. The more air routes we open to keep the Empire together the fewer problems will arise to keep it apart—London Sunday Express.

Delegates Entertained
At the annual convention of the Saskatchewan Rural Municipal Secretary-treasurers, the delegates and wives were entertained at a theatre party given by the Central Press Limited, Regina, and greatly enjoyed the picture "In Callente" shown at the Capital theatre. 2108

Tired and Irritable

Do you feel tired and nervous? Is your housework burdensome? Take Lydia E. Pinkham's Vegetable Compound. Mrs. M. A. Kelly of Woodstock, New Brunswick, says: "It was weak and rundown. A neighbor brought me your Vegetable Compound. It helped me so much that I am taking it now as the change."

Get a bottle NOW. It may be just the medicine YOU need.
Try Lydia E. Pinkham's VEGETABLE COMPOUND

Nikola Tesla Announces Amazing Developments In The Realm Of Science

Nikola Tesla, Yugo-Slavian scientist, celebrating his 75th birthday, claimed these three amazing developments in the sciences:

A new method and apparatus for transmitting mechanical energy in terrestrial distance.

Passage of an induction current with a varying flux one way only through a circuit without use of a commutator.

Proof after observation of cosmic rays that many of the propositions of relativity are false.

He elaborated these claims in an all-afternoon interview but did not offer proof of his assertions by exhibiting calculations or mechanical devices.

He would not concede at what laboratories he had pursued the work which, he said, had convinced him during the past year that ideas he has long entertained along these lines are correct.

He said his new means of energy transmission would be valuable in navigation, geology and physics. A ship, he asserted, by means of a communication system he would develop from his discovery within a year, could be kept to a true course without sidetracking in any weather.

Geologists would be able to explore mineral deposits from the earth's surface with more accurate results than they can obtain to with instruments now available. Physicists too, he said, would be able to determine much about the interior of the earth.

The use of direct current without a commutator, he said, would revolutionize motors for automobiles if practical engineers could carry out his findings.

He asserted relativists, in the light of his observations of cosmic rays, becomes what he has long considered it—a "beggared dressed in purple" which the ignorant mistake for a king.

Dr. Tesla said he was pleased by his mechanism for transmitting energy more than by any of the other advances he claimed to have made.

Of its effects he said: "It thus becomes possible to convey mechanical effects to the greatest terrestrial distances and to produce all kinds of unique effects which are of inestimable value to science, industry and the arts."

He added his invention could be used for destructive ends in war. A bomb might be exploded in mid-ocean by a machine no better developed than those he already has constructed, but qualified this by saying it would have to be a bomb he had constructed.

He said he thought this might later apply to any bomb.

Dr. Tesla explained his calling a press conference thus: "Since the death of Edison the public has looked to someone to turn to as a popular symbol of scientific advance, and I am supplying that need."

The statements of Dr. Tesla were read by Dr. Henry A. Barton, director of the American Institute of Physics, the co-ordinating organization for much of the scientific development in the fields touched by Dr. Tesla.

Education Fund

Benefactions Of Lawrence Of Arabia Are Revealed

One of the most valuable anonymous benefactions of Col. T. E. Lawrence—Lawrence of Arabia—was revealed in London. It was an education fund for the children of killed or wounded Royal Air Force officers.

The fund has expended \$4,000 (about \$19,400) since 1928 from an endowment fund from the receipts for the sale of "Revolt In The Desert," Lawrence's chronicle of his Arabian campaign during the Great War.

Scientists at State College, Pennsylvania, have designed and built a tillage meter, a new apparatus for testing plows and other tillage tools.

Marketing Research

Comprehensive Study Involves The Gathering Of A Great Deal Of Information

Many farmers who formerly were interested primarily in production are beginning to realize that the demand for the product which they have to sell is as important in determining the price as the supply of the product. One of the chief objects of agricultural marketing research, as carried out by the Economics Branch of the Dominion Department of Agriculture, is to obtain facts concerning the demand which will lead to increased returns to producers of agricultural commodities.

A comprehensive study of the marketing of any particular commodity involves the gathering of information of the whole process of distribution of that product from the producer to the consumer. Such a study includes investigation with respect to the methods and practices of those engaged in marketing, the costs of preparation and transportation, the facilities for handling at the farm, at the country point and at the terminal, auction or public market, wholesaling and retailing costs and the many aspects of the demand or preference of the ultimate consumer.

Such a comprehensive investigation might also include a study of the relations of quality or grade to the price obtained by the producer, the country buyer, the wholesaler and the retailer. In the nature of definite marketing research, very little study, according to the "Economic Analyst," has been devoted to the obtaining of facts on consumer preferences and competition with other commodities in overseas markets with a view to expanding the sale of Canadian export products in countries which now use but small quantities of these commodities.

Social Hygiene Council Is Determined To Carry On Aggressive Campaign

Determined to carry on an aggressive campaign, despite all handicaps, against communicable diseases and to promote public health generally in the Dominion, the Canadian Social Hygiene Council has, it believes, made a worthy record during the past four years. An earnest and continued fight to check the ravages of diphtheria, cancer, venereal diseases and other human ailments, the widespread dissemination of educational facts, and the promotion of knowledge among young people as to the care of their bodies, make up a story of compelling interest.

In 1930—the first year of the depression—the Federal Government discontinued the grant it had been making to the Council's nation-wide work over a period of years. This lack of financial aid, together with a serious shrinkage in other receipts due to the depression, was a severe blow. But those interested in the cause refused to bow to defeat. They felt that good health was among the most vital things in the life of a nation. Zealous for the public welfare, they attacked their task with renewed vigor.

The result is that the Council is able to make a report of far-reaching and successful service. Motion picture showing, thirty radio talks annually, co-operation with public health departments, newspaper articles, the creation of health leagues, public addresses, the establishment of a magazine and the constant distribution of useful literature have been some of the activities carried on.

Throughout this four-year period of struggle, with an annual budget of expenditure reduced from roughly \$60,000 to a little over \$30,000, the Canadian Social Hygiene Council has never lost sight of the original objective set up when the organization was brought into being in 1925 at the instance and on the urging of the Government of Canada, namely, Dominion leadership in health matters and a co-ordinated health programme from coast to coast.

With this always in mind, the Council in 1934, in view of the fact that the Prime Minister of Canada proposed to include health on the agenda of the inter-parliamentary conference of premiers, undertook to obtain the opinions of premiers, or ministers of health, of each province. These were ultimately published in "Health," the official organ of the Council, and given to the Canadian Press for publication throughout Canada. Copies containing the statements were forwarded to all members of parliament. Many newspapers commented editorially on the desirability of a conference between the Dominion and the Provinces on health. A large selection of these comments was then prepared and submitted to the prime minister. The conference, the first of its kind to be held in Canada, eventually became a fact as a consequence of government interests and of growing public opinion, and the important decision reached by this first "Cabinet of Health," as it might be called was that a Royal Commission on Public Health should be created to investigate the whole question of the cost of illness, present services for prevention and cure, and the possibilities for the future. This conference and its immediate results may well be looked upon as the achievement of an objective for which the Council has always striven. This alone would justify the existence and the work of the organization. It is hoped that the way is paved for further grants from the Dominion, as well as from the provinces and the public so that educational effort, so essential to the progress of the country, may be carried on.

Then, in order to continue an intensive campaign against diseases, the film "The End of the Road" was exhibited to over 46,000 people in Toronto, and 20,000 copies of literature were sold. The picture was later shown in various parts of Ontario and Quebec, being seen by 100,000 people in Montreal alone.

This was followed by the production in Hollywood, under the supervision of the Council, but without cost to it, of another film "Damaged Liver." It has proved to be one of the most valuable of the Council's contributions to health education. It has been shown in many parts of the world and has been seen by more than 750,000 persons in Canada. About 200,000 pieces of literature have been sold where it was exhibited. At least 5,000,000 people have seen it in Great Britain, not to speak of other countries in Europe, South America and elsewhere.

Another means of education has been through articles of various kinds which the press throughout the Dominion has carried. Radio work for health has been carried on over 18 stations through talks prepared by the Council on various health subjects which include communicable diseases such as diphtheria, smallpox, measles, scarlet fever, milk, the common cold, etc. Special efforts have been made during this past year to give talks on cancer and the Council was glad to co-operate with the Department of National Health and the King George V. Jubilee Cancer Fund in presenting talks on this subject, over its radio stations, both in English and French.

Other organizations and departments which use the talks the Council has made available are: the Greater Vancouver Health League and the Departments of Health of Saskatchewan, Alberta and Nova Scotia.

With this always in mind, the Council in 1934, in view of the fact that the Prime Minister of Canada proposed to include health on the agenda of the inter-parliamentary conference of premiers, undertook to obtain the opinions of premiers, or ministers of health, of each province. These were ultimately published in "Health," the official organ of the Council, and given to the Canadian Press for publication throughout Canada. Copies containing the statements were forwarded to all members of parliament. Many newspapers commented editorially on the desirability of a conference between the Dominion and the Provinces on health. A large selection of these comments was then prepared and submitted to the prime minister. The conference, the first of its kind to be held in Canada, eventually became a fact as a consequence of government interests and of growing public opinion, and the important decision reached by this first "Cabinet of Health," as it might be called was that a Royal Commission on Public Health should be created to investigate the whole question of the cost of illness, present services for prevention and cure, and the possibilities for the future. This conference and its immediate results may well be looked upon as the achievement of an objective for which the Council has always striven. This alone would justify the existence and the work of the organization. It is hoped that the way is paved for further grants from the Dominion, as well as from the provinces and the public so that educational effort, so essential to the progress of the country, may be carried on.

Rewarded By Two Kings

Story Of Royal Error Told By Retired Minister

Friends at Farmington, Mass., just learned that Rev. Robert van Smith, a retired minister, received a reward from the king of two countries. It was in 1875 when the minister was pastor of a small parish on the Nova Scotia coast.

One night during a terrific storm a vessel went ashore on a reef near the harbor. The minister summoned all men of his parish and two seamen were rescued from the rocks. Bodies of five more of the crew of twelve were recovered.

Weeks passed and a package came from "King Oscar II. of Sweden." It contained a beautiful communion set of gold, water cup and a goblet with the arms of King Oscar of Norway and Sweden. The set was from the king of Sweden, the message said, for the rescue of Swedish sailors.

A few days later another message arrived. The set was not from "King Oscar of Sweden" but from King Oscar of Norway. The wrecked vessel was from Norway and the seamen he saved were Norwegians. So the communion set was from King Oscar of Norway.

The minister and his friends are enjoying the story and the polite formality of the messages which their recipient has saved these forty years.

The Vegetable Garden

Average Farmer, Perhaps, Does Not Realize The Full Value

The value of vegetables in reducing the food costs in the farm home is not fully realized, and because of this there are comparatively few good vegetable gardens around the average farm home. A crop value of \$30 for one-quarter of an acre of land in different vegetables is certainly not excessive, and taking for example one province alone, namely Nova Scotia, where there are 50,000 farms and garden holdings capable of producing crops worth this amount for household use only, the total amount would be equivalent to \$1,500,000. There are, of course, many essential details to which close attention must be given if success in vegetable growing is to be achieved, but the management of these details is not beyond anyone who can form reasonable judgments in his undertakings. Further, in the questions as to size of garden, location, preparatory tillage, maintenance tillage, commercial fertilizer, cool and warm-season vegetables, good seed, plan of garden, plan of planting, vegetables recommended and other important items, full information is given in the publication "The Vegetable Garden" by W. S. Blair, superintendent of the Dominion Experimental Farms at Keeyville, issued by the Dominion Department of Agriculture, Ottawa.

Dangerous Drug

Canada And United States Co-Operating In Fight Against Narcotics

Canada has asked the United States to co-operate with her to meet the growing menace of cannabis sativa, better known as hashish or marijuana. Cordell Hull, secretary of state, told the World Narcotic Defence Association in a message read at its New York convention: "This dangerous drug," Mr. Hull said, "is produced from a plant which is to be found in most parts of the country and is a menace particularly to the youth of the land."

Mr. Hull also expressed his "particular appreciation" of the close and effective co-operation which United States authorities have always received from the Canadian authorities charged with control of the narcotic drug traffic.

Onions are expected to constitute Egypt's second best money crop this year.

The SNAPSHOT GUILD

LET THE SUN WORK FOR YOU

Watch for unusual lighting when taking snapshots of outdoor scenes.

Many of you who want to take your photography seriously and get some really attractive, artistic pictures would probably like to have some further information on proper lighting in taking snapshots.

The lighting of the subject has so much to do with securing that quality often referred to as "atmosphere" in a picture. There are a number of ways in which a photograph may be given apparent depth, or third dimension. Taking pictures when there are long shadows, getting a reflection in the foreground, using strong side-lighting or backlighting, and tinting the exposure just right so that the detail of objects in shadow is not blocked out, are procedures which contribute much to the desired effect.

Suppose we consider each of these separately. Shadows, thrown in long drawn-out splashes across walls and walks, makes one feel more than anything else, that he is looking into a picture instead of looking on a flat piece of paper carrying images of recorded objects. The foreground should be well broken up with shadows so that there is not too much contrast between it and the rest of the picture.

When a body of water can be included as part of the foreground, there are really wonderful opportunities for adding depth. The reflection will carry one's attention back and away from the foreground

and into the picture—and lead to the principal point of interest. The only precaution necessary when snapping a picture with a foreground of water in strong sunlight is to watch that a swell or wave does not throw reflected sparks of light upon the lens, as that may fog the picture.

Along the roads and trails through forests where long spears of sunlight pierce into the shadows there are unlimited opportunities for striking pictures with depth. If the foreground of your picture is not well lighted, and you want to get the effects of sunlight shooting through the shady parts of the background, an exposure slightly shorter than you would ordinarily make is advisable.

Don't just open your camera and shoot when taking pictures. Give your subject some thought and in doing so you will be rewarded with pictures which will be proud of and which they will want your appetite for many more snapshots. Perspective means much and is an important factor in picture taking. It too, has much to do with the perspective we get in pictures. It is the perspective is not pleasing to the eye; it will not be pleasing in the picture, so as I have said before, study all the possibilities and angles of your proposed picture before you snap it.

JOHN VAN GULDER.

Crawfish have eyes in their tails.

WORLD HAPPENINGS
BRIEFLY TOLD

Great Britain has apportioned more than \$25,000,000 to maintain her security by strengthening her air defence.

More than 1,000 settlers have been established in various parts of Quebec under the \$10,000,000 colonization plan. Hon. Erenée Vaurin, Quebec minister of colonization, stated.

Single men able to work and refuse to help farmers with their harvest, will lose their city relief allowances, Mayor G. Wilton of Hamilton has announced.

In Toronto Judge James Parker criticized the Canadian Performing Right Society for keeping the public "in the dark" to its tariff for the playing of "protected" music.

Festivals of steam rust were found in wheat in the University of Saskatchewan's grain fields. Garnet wheat, which has little resistance to the fungus, showed most of the infestation.

A higher tonnage of merchant vessels is under construction in the world than at any time since 1922. Lloyd's quarterly report revealed. Germany leads the world outside of Great Britain, with 237,000 tons under construction.

Manitoba was 65 years old on July 15. The province was created and admitted to the Dominion July 15, 1870, though it was not until Sept. 2 of the same year that Manitoba was officially considered a unit of the Dominion of Canada.

Vancouver Island lumber mill managers have received from export sales organizations copies of the last batch of lumber orders from Japan to this continent. Each order has the notation: "Not to be supplied from mills in Canada."

China Goes Modern

Campaign Against Footbinding in Peiping

A campaign against footbinding in the city of Peiping has been launched by Yuan Liang, famous in China as the "blue law" mayor of Peiping. Six regulations have been devised governing the execution of the movement.

The first regulation is that girls under 15 will not be allowed to bind their feet. Those that have already done so are ordered to unbind them immediately. Women between the ages of 15 and 30 who have their feet bound are given three months in which to unbind them. Women over 30 are permitted to unbind their feet at their leisure.

Failure to observe the new regulations results in a fine not to exceed \$10 in Chinese money (\$4 in Canadian) for the first warning, but if warned a second time the fine automatically becomes \$100 in Chinese money, or about \$40 in Canadian currency.

Bird Refuses Freedom

Prefers To Stay With Convict Who Befriended Him

Squeegie, the bird in an unglazed cage, had his chance at a pardon from Statville Prison in Joliet, Ill., but scorned it for his steel and concrete home in cell block C.

The manner in which Squeegie eschewed liberty brought a smile to John Post, 65-year-old convict, who has been Squeegie's master, confidant and cellmate since a day in 1933 when he found the burned lark fluttering in the prison yard with a broken wing.

Post, sent up for burglary, mended the fracture and spent his last \$1.50 for bird seed. Squeegie moved into Post's cell.

But Post has still a year "in stir" and suggested to Warden Whippy that Squeegie should get his pardon. Accompanied by the warden, the old man went into the yard and tossed the lark into the air.

Squeegie soared over the wall—but flew right back to Post's shoulder.

"I'll keep him," said Post.

The British Museum has a piece of iron taken from the Pyramid of Gizeh, which is believed to date from 400 B.C., and an axe head of Egyptian manufacture dating from 1370 B.C.

SUNDAY SCHOOL LESSON
JULY 28

AMOS (Prophet of Social Justice)

Golden text: Let justice roll down as waters, and righteousness as a mighty stream. Amos 5:24.
Lesson: Amos, Chapters 4 and 5.
Devotional Reading: Psalm 87: 2-13.

Explanations And Comments

Three Visions of Judgment, Amos 7:1-9. Amos, the prophet from Judah, has gone to Bethel, the capital of the Northern Kingdom of Israel, to warn them that the nation is ripe for judgment. He tells them of a series of visions in which God has revealed to him what will come to pass. He described a plague of locusts devouring the vegetation, but God stayed his hand against the people when Amos cried, "O Lord Jehovah, forgive, I beseech thee."

Next he had a vision of a terrible drought. "The great deep," the underground ocean on which the Hebrews imagined the earth to rest, had dried up, and the land, without its springs and fountains, was being burnt up by the sun's scorching rays. Again the prophet prayed, "O Lord Jehovah, cease, I beseech thee," and his prayer was heard.

His third vision depicts Jehovah with a plumb line in his hand standing before a crooked wall and measuring it. As far off from rectitude as that crooked wall was the Northern Kingdom in all its wickedness, and the judgment of God could no longer be withheld, further intercession would be futile. "The Eternal said, With a plumb line I test my people; never again will I pardon them" (Moffatt's translation). "The high place of Israel shall be desolate, and the sanctuaries of Israel shall be laid waste and I will rise against the house of Jeroboam with the sword."

Amos' Reports to the King, verses 10, 11. Amaziah, the high priest of the sanctuary at Bethel with its golden calf, sent a message to Jeroboam II, the King of Israel, accusing Amos of treason, of predicting the death of Jeroboam by the sword and the captivity of the people. The land, he said, was not able to bear all Amos' words—so monstrous were they.

Amos Answers Amaziah, verses 14-17. Then Amos pronounced woes upon the priest and the members of his family and upon the house of Israel, should be led away captive out of the land.

Will Not Cut Corners

Machine Which Is Wizard At Mathematics Nearing Completion

A machine which can beat the combined efforts of 50 finest mathematicians of the world is rapidly approaching completion at the Victoria University, Manchester. In the space of ten minutes it will be able to dispose of problems which would keep even the most quick-working of human mathematicians busy for two days. It will not get tired, never suffer from headaches, and never misread its own figures. Sheer lack of time may compel the most conscientious mathematician to make "second-best" approximations. This robot mathematician has no need to "cut corners." Professor Hartree, its inventor, wants to probe many hitherto unsolved mysteries of the atom, of the travel of radio waves, and of aeroplane flight with the aid of this robot.

Would Be Gladly Welcomed

British Working On Signal To Eliminate Telephone Waiting

In response to a long-felt want the British Post Office is said to be experimenting with a signal which will enable the caller to lay aside the instrument while waiting for the callee. It is to be a different click from that breaking connection and, from its double sound, will be called the "cuckoo." That such a click is needed is shown by many letters in the London Times, one of which reads in part: "It seems extraordinarily clumsy that people have to hold on often for several minutes, unable to pursue any other occupation, because no one can invent some method by which the telephone shall give tongue when the receiver at the other end is taken up again. I suppose that many hours a day are wasted in this tedious and empty employment of standing or sitting with a receiver to the ear waiting for the required voice."

Symbol of all things firm and strong, the Rock of Gibraltar is now chained up to keep its summit from toppling into the sea. 2108

THE MOST WELCOME ARRIVAL IN YEARS

There was great rejoicing at the Zoological Gardens, London, England, when this little fellow stepped into the world. He is a beautifully marked Harnessed Antelope, the first to be born in the Zoo since 1899. Along his back and following the line of the ribs are a number of white stripes which suggest the strapping of harness.

Ruled By Foreigners

Only One Of Europe's Dictators Is Native Born

Most of Europe is now ruled by dictatorships. Strangely enough, most of these dictators are not natives of the countries of which they are absolute rulers. Adolf Hitler of Germany, for example is an Austrian by birth; Mustafa Kemal of Turkey, is a Greek from Salonika; Joseph Stalin of Russia was born in Asiatic Georgia; Eamon De Valera of Ireland was born in New York City; the late Josef Pilsudski of Poland was a Lithuanian. Only Mussolini, among all the more important dictators of Europe, is a native of the country he rules. He was born in Dovis, Italy.

A Friendly Tip

During the day, Mrs. Brown discharged her old maid and hired a new one, who answered the door bell when Mr. Brown arrived home in the evening. Mr. Brown carried a bunch of roses, which he handed to the maid, saying: "Give these to Mrs. Brown, and tell her I want to see her at once."

"All right," said the maid, "but you better make it snappy, because she expects the old man any minute now."

Retains His Popularity

Prince Of Wales Will Always Be Charming Person

At 41 the Prince of Wales is still an interesting and popular figure, though the charm of his youth has inevitably departed. As a young man he has captured all hearts much as Bonnie Prince Charlie did. But his has been a happier lot than that of any of the Stuarts.

From his wide travels he brought back a mature conception of duty, and at home he has studied closely the lives and fortunes of the British people. That he has never married is a disappointment. But this is a detail. No heir to the throne has more faithfully fulfilled the obligations of his position—Philadelphia Inquirer.

A Royal Business Man

Lord Carsbrooke, son of Princess Beatrice, and a grandson of Queen Victoria, is not in receipt of any pension from the State, says the News of the World. He has to earn his livelihood, and is a director of several companies, including Lever Bros. He was trained for business as a clerk in the merchant banking house of Lazard Bros., and while there did the ordinary day's turn from 9:30 to 6 just like the other clerks.

Little Journeys in Science

THE BUILDING STONES OF THE UNIVERSE

(By Gordon H. Quast, M.A.)

Scientists have discovered that in decomposing certain materials by means of such agencies as heat and electricity, one always finds substances which resist all efforts to decompose them. These materials compose them. These materials which cannot be broken up into simpler substances are known as chemical elements. At the present time 92 of these simple and fundamental forms of matter have been discovered.

Water can be decomposed by electricity into the gases hydrogen and oxygen. Red oxide of mercury can be broken up by heat into mercury (quicksilver) and oxygen, and common salt, under certain conditions, yields the metal sodium and the greenish-yellow gas chlorine. Other important elements are iodine, iron, calcium, carbon, sulphur, aluminum, silicon, aluminum, silver, and gold.

In recent times scientists have discovered that certain substances, known as radioactive elements, decompose spontaneously into other elements. The elements thus control over these changes. This fact is illustrated in the metal radium, which spontaneously splits up, producing a number of other elements, such as helium, radon, and lead.

It is a very remarkable fact that when elements unite to form new substances, which are known as chemical compounds, they lose complexity. An example is an excellent example of this is common salt, which contains the element sodium (a soft, silvery metal that reacts violently with water to produce hydrogen) and chlorine (a greenish-yellow, poisonous gas). In chemical compounds, however, these elements form salt, a white compound which is a necessary part of our diet.

Some common elements occurring naturally are gold, platinum, copper, oxygen and nitrogen. Most of the elements, however, are combined with others in compounds, and it has been found necessary to decompose compounds in order to obtain them. Most of the elements are solids, a few occur as gases and only two, mercury and bromine, are liquids under ordinary conditions.

Although there are 92 elements, only about 25 of these are at all common and important. Moreover, it has been calculated that about 98 per cent. of the earth's crust and the atmosphere is composed of only eight elements. These are oxygen (26.5 per cent.), silicon (26.5 per cent.), aluminum (7.35 per cent.), iron (4.25 per cent.), calcium (3.25 per cent.), potassium (2.45 per cent.), sodium (2.45 per cent.), and magnesium (2 per cent.).

The spectroscopic, an instrument invented by the scientists for the detection of chemical elements, has enabled man to study the composition of the sun and stars. The elements aluminum, calcium, carbon, copper, helium, hydrogen, iron, nickel, nitrogen, oxygen, silver, and many others have been detected in the sun.

This science has revealed that all matter is made of atoms, and that atoms are built of these simple and elemental forms of matter known as elements.

Recipes For This Week

(By Betty Barclay)

AMBASSADOR STRAWBERRY TARTS

1 cup cream, whipped
1 egg white, stiffly beaten
¼ cup sugar
½ teaspoon vanilla
1½ cups moist, sweetened coconut
1 cup sweetened sliced strawberries
6 baked 3¼-inch tart shells
Combine cream, egg, sugar, vanilla, and 1 cup coconut. Place strawberries in bottom of tart shells, pile cream mixture on fruit, and sprinkle with remaining coconut. If desired, place one whole strawberry on each tart before sprinkling with coconut. Serve at once. Serves 6.

RED RASPBERRY JAM

4 cups (2 lbs.) prepared fruit
6½ cups (2½ lbs.) sugar
½ bottle fruit pectin
To prepare fruit, crush or grind about 2 quarts fully ripe berries. Measure sugar and prepared fruit into large kettle, mix well, and bring to a full rolling boil over hottest fire. Place containers for jam and while boiling. Boil hard 1 minute. Remove from fire and stir in bottled fruit pectin. Then stir and skim by turns for just 5 minutes to cool slightly, to prevent floating fruit. Pour quickly. Paraffin at once. Makes about 10 glasses (8 fluid ounces each).

Leprosy reached America from both Europe and Africa.

Household Arts

by Alice Brooks

This Is a Jiffy Knit It Takes Little Time To Make

PATTERN 5395

If you want to make the most of your time, make this jiffy knit. Large needles and a heavy thread (candlewick, that very heavy cotton, or German wool) make it get done in no time. The entire blouse is in one piece. You have only one side seams to sew. The openwork yoke contrasts effectively with the closer stitch of the body of the blouse. As you can see in the detail, the stitch of the blouse has the effect of stripes. The blouse is lovely for summer, will be very practical for fall and winter, too, short sleeves being quite the thing for wear with a suit. Directions for the plain knitted skirt come with the pattern.

In pattern 5395 you will find complete instructions for making the blouse shown and the skirt in size 16-18 and 36-40; an illustration of it and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper and Book, 175 McDermott Ave., Winnipeg.

There is no Alice Brooks pattern book published.

MARKETING PLAN FOR WHEAT CROP WINS APPROVAL

Saskatoon.—Complaint of misrepresentation in the press of the wheat marketing legislation was made by L. C. Brouillette, president of the Saskatchewan Wheat Pool, speaking at the evening session of the convention of the United Farmers of Canada at Saskatoon. He praised the plan as likely to give a substantial reduction in interest rates on the money required and providing leadership in marketing which he held might lead to co-operation with other exporting countries.

As far as the compulsory features of the measure were concerned, they appeared just as clearly in this act as in the original bill.

There was no guarantee in the original draft of what the board would do. Under the present act if the board wished to apply these features the minister of trade and commerce could give effect to them.

Papers had referred to a strong pool delegation at Ottawa. There was one person. It would have been more correct to speak of the strong grain trade delegation there.

There seemed a misapprehension in the House of Commons as to the services that Mr. McFarland was to render, an opinion that his job was to market wheat. His work was to stabilize the market to enable the farmer to get a price.

Explaining the act he pointed out that of the advisory board of not more than seven members, four must represent the producers.

In regard to financing, the provisions were broad enough to allow access to the Central bank through the government. This should result in low interest rates. He anticipated a substantial reduction. Wheat was the best of security in view of the present world situation.

With an idea of causing a low minimum price to be set, statements had appeared that the western farmer could produce wheat at 40 cents per bushel, about half the real figure.

Mr. Brouillette held that the minimum price should not be a price certain to be realized for the grain but one approaching the cost of production.

The principle of protection of industries was established in Canada. Enormous payments had been made by the west to the east on this account. This act was an attempt to let the farmer share in that protection.

A tax on flour had been considered but it would have fallen on poor people. This system was better as the prosperous would contribute a larger share.

If the minimum price was what it should be, the speaker could not see where a bushel of wheat would be offered on the open market.

A grain trade representative had wanted the wheat board to buy on the futures market. He had told the committee he was opposed. It was not the intention of the act to stabilize the futures market. That attempt had been the cause of grief to Mr. McFarland. The amendment did not go through the committee.

He condemned the talk of "sales policy" which he said had caused a fall at Liverpool costly to Canada.

He saw the new system as giving leadership in marketing. Brokers had no more interest in Canadian than other wheat. This legislation was a step in the right direction.

Two Passengers Killed

Six Others Escaped When Plane Wrecked in England

London.—Two persons were killed in the blazing wreckage of an aeroplane which crashed at the edge of Heston aerodrome after a take-off for Southampton for the silver jubilee review of the British fleet.

The dead were two passengers, Major J. H. Hobbs and N. Newhouse. The pilot and the five other passengers, including one woman, Margaret Vickers, were rushed to hospital suffering from burns and injuries.

Severe Hail Losses

Damages Reported To Be Heavy In Some Alberta Areas

Calgary.—Heavy hail damage to crops, in some cases reported to be 100 per cent., was caused by storms which struck several districts of southern Alberta last week. Areas hit were Stavely, Carleton Place, Strathmore, De Winton, Grasmere and Macleod.

Serious losses were suffered at De Winton as hail swept a large area around that town and continued east toward Carleton Place and Strathmore. Strathmore's losses were reported to be light while at Carleton Place damage was fairly heavy. De Winton's losses will run between 75 and 100 per cent. over most of the district. Hailstones as large as marbles fell.

Heavy losses were feared at Stavely and Grasmere. Heavy rain fell over most of the southern section of the province and at Brooks it was reported to approach cloudburst proportions.

From Aldrie came a report that a severe electric storm struck the district and farmers six to eight miles south were hauled out in the heaviest hail storm in several years.

Recovery In Australia

Premier Lyons Tells Of Methods Taken To Cut Expenses

Vancouver.—Everybody had to take a "cut" to help Australia get on her feet economically, Prime Minister Joseph Lyons of that dominion said during a brief stay here.

The bondholders had to take less, the public servants had to accept reductions, the taxpayer had to pay a bit more, he said. "Since the turning point in 1932 we have been able to lighten those burdens. The public servants on the lower levels have had their pay restored; the taxpayer has had his burden lightened. We have cut the land tax in half to help the farmers. Recovery in Australia is not complete, but it continues."

Air Mail Cachets

Inaugural Flights On Kenora-McKenzie Route Announced

Moos Jaw.—Inclusion of the town of Moos Jaw as a point of call on the air mail route from Kenora-McKenzie Island-Red Lake on August 15 brings special commemorative cachets on mails to be carried on the inaugural flights, according to information received at the Moos Jaw post office.

These commemorative cachets will be "Kenora-Cole," "Cole-McKenzie Island," and vice-versa in each case. Covers should be sent to the district director of postal services, Winnipeg, not later than August 10.

Experimental Station Post

L. B. Thompson To Take Over Duties At Swift Current

Ottawa.—L. B. Thompson, officer in charge of the Dominion range experimental station at Manyberries, Alta., has been appointed superintendent of the experimental station at Swift Current, Sask. It was announced from the agriculture department, Mr. Thompson succeeds Hon. J. G. Taggart, now minister of agriculture for Saskatchewan.

Mr. Thompson was born in New Zealand 35 years ago. He is a graduate of University of Alberta.

Grain Elevator Burned

Lethbridge.—Breaking a drought spell of more than six weeks during which Lethbridge had the lowest June rainfall on record, heavy showers, amounting to cloudbursts in places, fell over the Lethbridge area. At Barons, No. 1 Pool elevator was struck by lightning and burned with a loss of slightly over 15,000 bushels of wheat.

Ontario Needs Farm Help

Ottawa.—Acute shortage of experienced farm labor on tens of agricultural fronts in Ontario, with an anticipated scarcity of a tenth district, was reported to the department of labor following a Dominion-wide survey. Ontario alone stood in this category. All other provinces telegraphed local supply would meet labor demands.

TO RETIRE

Hon. R. C. Matthews, Minister of National Revenue in the Dominion Government, will not seek re-election to parliament during the coming General Elections. His health is the cause of his retirement from politics.

Wheat Board

Expected To Commence To Function On Sept. 1st

Ottawa.—The Canadian wheat board probably will take over operations Sept. 1, it was learned here. Until it begins to function no announcement is expected as to the disposal of the wheat carryover, except the repeated assurance of Premier R. B. Bennett it would not be dumped on the market.

The visible supply of Canadian wheat is now somewhat under 200,000,000 bushels and will be less at the end of the crop year, July 31. It is not expected much new wheat will come on to the market before Sept. 1 because the late spring held back seeding, so the visible supply should continue to fall until that date.

Personnel of the new board will be announced shortly and one of its first duties will be to decide the minimum price to farmers. The suggestion has been advanced to the government farmers should receive 50 cents a bushel for number one northern on the farm as a first payment. This would be around 70 cents at the head of the lakes, it is contended.

The act creating the board provides the board buy wheat from the farmer at a fixed minimum price and make later payments if it is able to dispose of the wheat at prices higher than the minimum.

Prize For Westerner

Montreal.—Sydney Buckwold of Saskatoon, student in the third year of the faculty of commerce at McGill University here, has been awarded the Joseph H. Jacobs prize for accountancy. The prize is valued at \$25.

Alberta Elections

Date For Polling In Provincial Contest Set For Aug. 25

Edmonton, Alta.—All parties are preparing for what promises to be one of the most keenly fought campaigns in years following official announcement Alberta provincial elections will be held Thursday, Aug. 25, with nomination day, Aug. 12.

Announcement of polling dates was made by Hon. George Hoadley, acting premier, in the absence of Premier R. G. Reid, leader of the United Farmers of Alberta forces, which party has held power for 14 years.

Floods in northern Alberta which handicapped compilation of voters' list caused the government to postpone selecting a date until now, Mr. Hoadley said. However, the flood situation had not improved materially and it was decided further delay would be inadvisable, particularly in view of the prospect of an early Dominion election.

All political parties, including the newly-formed Alberta Social Credit Party, have been holding nominating conventions during the past few weeks, and it is expected more than 200 candidates will be in the running for the 63 seats in the legislature.

Strikers At Vancouver

Men Decline To Work At Relief Camp

Vancouver.—Approximately 150 relief camp men who went on strike at four camps near Hope, 80 miles from here, arrived in Vancouver by freight train.

When the men declined to work, camp authorities issued an ultimatum that they must work or leave camp. Some 50 British Columbia police were sent to the camps to enforce the ruling.

There was no trouble. The men continued to decline to work and were taken in trucks to Hope where they caught a freight. Each man was given 60 cents on leaving camp.

A delegation from the strikers waited on provincial relief officials and asked for relief. They were refused. Most of the strikers, it is reported, are members of the group which arrived in Vancouver recently from Regina.

New Governor-General

London.—Canada's next governor-general, Lord Tweedsmuir, was guest of honor at a luncheon tendered by the Canadian Chamber of Commerce. "I am warned off every variety of politics and will be for the next five years," he said smilingly. He sat as a Conservative in the House of Commons here for some years, as John Buchan, before elevation to the peerage.

SEEK SOME WAY TO AVERT AN ETHIOPIAN WAR

London.—Anthony Eden, again in the role of peace-maker, will head Great Britain's delegation to the League of Nations council session opening this week called to seek some way to avert an Italo-Ethiopian war.

Other developments in the East African situation, which British officials continued watching close were:

Malcolm MacDonald, secretary for colonies, told the commons British military forces in Kenya, bordering Ethiopia and Italian Somaliland, had been "partially reconstituted" in view of "possible contingencies on that frontier."

Sir Samuel Hoare, foreign secretary, replying to questioners, expressed his belief it was not necessary to reinforce the normal peace-time garrison in the Sudan.

Usually well informed quarters said Britain was ready to authorize arms shipments to Ethiopia, following receipt of communications from Emperor Haile Selassie, certifying his empire's need of two shipments held up here "for the legitimate use of the Ethiopian army."

Medals For Veterans

Alberta Men Honored For Service In Red Revolt

Edmonton.—While an enthusiastic audience of 4,200 paid homage with applause, 27 of the early west's famous fighting men who participated in the campaign against the rebel Louis Riel in 1885 got recognition for their part in that historic struggle when they received "peace medals" given to them at the Edmonton exhibition by the Northern Alberta Pioneers' and Old-Timers' Association.

The veterans marched single file on to the stand, shoulders squared and heads erect, giving little evidence that half a century had passed since they had stood in that fashion in solid ranks. Hon. W. L. Walsh, lieutenant-governor of Alberta, and Major General Hon. W. A. Griesbach lauded their conduct in the frontier warfare.

Inspect Armament Plants

Sir William Jowitt Wants To Get At The Bottom Of Trade In Arms

London.—Summoning of many distinguished British financiers and industrialists witnesses, an inspection of Britain's armament plants, and finally nationalization of these plants were urged upon the royal commission on private manufacture and trade in arms by the Union of Democratic Control.

The president of the union, Sir William Jowitt, on the witness stand urged the commission to "take steps comparable with those taken in America in getting at the bottom of things."

Aerial Cruiser

Largest Land Plane Ever Assembled Awaits Tests In U.S.

Seattle.—A giant aerial battle cruiser, described by its builders as the largest land plane ever assembled in the United States, awaited tests here before being submitted to the army corps.

The 15-ton ship, with its huge mid-wing spread of 195 feet and an overall length of 70 feet, is powered with four 725-horsepower motors, equipped with automatic variable pitch constant speed propellers. It is reported capable of flying from 200 to 250 miles an hour.

Victims Of Chinese Flood

Hankow, China.—Unofficial reports from Tientsin, Hopei province, said 14,000 bodies have been recovered from the flooded Han river. These advised said 4,000 refugees had been rescued from tree-tops in that vicinity. Tientsin is 75 miles west of Hankow.

ROYAL AIR FORCE THRILLS THOUSANDS

A tremendous crowd attended the annual R.A.F. display at Hendon this year to witness the best display ever put on by the daring British fliers. Here we see part of the No. 26 Squadron of Audax planes roaring over the heads of a small section of the crowd.

GETS SO LITTLE IN RETURN

The farmer is on his land; the fishermen are busy on the Great Lakes; the lumbermen who reap their strange harvest of gigantic plants in winter are floating their logs to the mills. The work of digging beauty and comfort and luxury out of the earth or whisking it off the surface of the earth is in full swing. For that is what it all amounts to; beauty and comfort and luxury are the echoes of every stroke of the woodman's axe or the miner's pick. From the soil and the sea and from the thin skin of world covering which man has probed with his drills and his implements of exploration the things which he prizes most are wrested with unremitting toil.

It would seem, then, that among the greatest servants of mankind are men whose daily duty is to get from the sea or the soil the things which enable man to live as men have never lived before. The farmer who feeds and helps to clothe the world, the miner whose metals, whose gems and whose fuels are of such importance, the lumberman and quarryman whose labors make possible the building and furnishing of great business and commercial palaces, the trapper whose furs are of such delightful softness and warmth—all these primary producers who drag food also from the sea, are, it would appear, among the greatest benefactors of man. But how little of their benefactions do they themselves enjoy?

They are among the world's hardest toilers, but others enjoy the fruits of their labors. The finest shoes that are made from the hides he markets, the finest clothes that are woven from the sheep's wool, the farmer never wears. The miner's wife does not deck herself with jewels. The quarry men do not live in marble halls. The lumbermen's logs do not come back to them in lovely furniture. The man who produces coal or oil knows nothing of the luxury liners which use it. The primary producers have perforce to content themselves with a very meagre share of that which they wrest from the earth and its rocks and its waters.

The best of what they produce goes to the great cities; the greater the city, the greater the luxury it can show. The finest marbles, the most glorious jewels, the daintiest foods, the most beautiful clothing—these things seem to be drawn to the great cities as by a magnet. The farmer's barn, even the barn of which he is proudest, is a thing of no account at all beside the marbled magnificence where the city money-changers dwell. There is, in fact, a city term of contempt—"a regular barn of a place."—Toronto Star.

W. T. Propp Is the R.O.

Writs for the Provincial Election on Aug. 22 were issued on Monday by John D. Hunt, chief returning officer. Mr W T Propp has been appointed returning officer for this constituency.

P. O. H. Opened Wednesday.

Yesterday, the 24th, was the day set for the opening of the Alberta Protestant Orphans' Home in Edmonton, the institution over which Rev W E Sieber has been appointed the superintendent. Invitations to attend the opening ceremony had been sent the pastors and members of the congregations of the United and the other churches. Rev L G Sieber, pastor of Stony Plain United church, was present, accompanied by members of his congregation.

CHAPTER IX—Continued

"Walk straight up the road till you pass my house and see a path lead into the woods. It's terrible steep and I ain't attempted it for years, though Tubbs and I got engaged to be married up there under the old pine. You'll find our initials cut in the bark with a heart around 'em. Victor Tubbs is a real good carver. If you run into anybody from the Adam ranch, Nancy, tell 'em you'll want extra milk to-morrow. And would you mind pecking in my bedroom window and see if Tubbs is asleep? He's got a delicate stomach, and his supper didn't set good last night."

Suppressing a smile at this unique request, Nancy promised and started on her way. The afternoon was all her own, and it was impossible not to feel a thrill at this unbelievable December day. The sun was warm; yet the paper reported a blizzard raging in New England! It seemed incredible; and next week, Nancy mused regretfully, the Country Club would be gay with winter sports.

"I wouldn't be there anyway," she consoled herself, as the homesickness she had supposed, vanquished, raised its head again. "To be at Edgemore wiping dishes for Mother, or mopping up puddles of snow brought in by Phil. Here's the Tubbs abode already. I must see if Victor's asleep."

This brought a smile, and homesickness retired to that place where such things go when we forget ourselves. Aurora's house which set back a space from the road, was a one-story affair covered with tree-bark, and almost hidden in a grove of stunted pines. Nancy went softly up the path and peered in at a window. By pressing her face against the glass she made out an ornate iron bedstead on which the recumbent Tubbs was snoring peacefully; while one of his wife's rich layer cakes and an open jackknife stood on a nearby chair.

"Thinking of Victor's 'delicate stomach,' the girl chuckled as she turned away. No wonder his suppers failed to digest! Should she tell on him? Nancy decided against this; but vowed that Cousin Columbine should hear the story. It was too good to keep."

She still smiled as she resumed her walk; but that path into the woods seemed to elude her. Concluding that she had missed it, Nancy stepped aside to escape the dust from an approaching truck, and recognizing the halting figure of Matthew Adam, halted him as he was about to pass.

Although on one pretext or another, Mark had dropped in almost every day of the past two weeks,

Nancy had not seen Matthew since his blushing exit after colliding with Aurora Tubbs. He was blushing now, the girl observed, and wondered if it were the same blush, or a new one for her special benefit! She said, as a shy smile hovered across his face on recognizing her: "Sorry to make you stop if you're in a hurry, but Aurora wants more milk to-morrow. And will you show me how I can reach that hill? I've lost my way."

As Matt slid lightly from the truck to stand beside her, Nancy was again impressed with the young man's appearance. His blush had subsided; but something told her that he was struggling with embarrassment and furious with himself because of it.

"You should have turned off just after you passed Aurora's," he told her, "but it's no wonder you missed the trail, so few go up that way. It's an easier climb from the other side. If—if you don't mind riding on the truck I'll take you 'round."

He was blushing again. Nancy caught the idea that he had forced himself to make the offer out of politeness, and thus responded: "Aren't you too busy?"

"Not busy at all; but this truck is second cousin to Methuselah, and—"

Nancy laughed. "You needn't apologize for the truck! I'm tickled to go for a ride in anything at all. My feet have had plenty of use since I struck Pine Ridge; but that hill tempted me, and the day too. Isn't it glorious?"

With Matt's assistance she had reached the seat, and said, as they backed around: "Is it far to the other side of the hill?"

"A couple of miles, maybe."

"Mile! Why I thought it was only a step!"

"To the top of that hill? Well, it's not much more, from here; but it's pretty steep, and we can ride half way up from the other side. My mother used to take us there on picnics when we were kids."

Blushing that the young man's embarrassment had dropped away when he spoke of his mother, Nancy grasped the cue.

"Cousin Columbine tells us that Mrs. Adam is—well, what she said was: 'Eve Adam is a grand success as a mother!'"

"I'll say she is!" Matt faced her, smiling, and Nancy said that he had completely forgotten himself at last. Then the color dyed his face again and he stammered awkwardly: "I—I don't mean that we boys have turned out anything above the average; but—but that—"

"I know what you mean," smiled Nancy, coming to his rescue, "though I think Cousin Columbine meant just what you're denying. It must be nice to have such enviable reputations! How did your mother manage it with all four of you?"

She couldn't resist teasing him a little, but it was kindly and which made her bring the conversation back to his mother; and Matthew answered: "By being herself, I guess. She was always on hand, you know, so perhaps we didn't get into as many scrapes as some kids. Mother's a wonder, and Dad is too. I'm rather crazy about my people, but—but I've said enough. Don't know what got me going or—"

"I got you going!" admitted Nancy, a twinkle lighting her blue eyes. And then: "Oh, look! Is that a snow-capped mountain range on the horizon?"

Matthew nodded.

"Here's where we turn. Do you mind a little cross-country riding in this old wreck? You're likely to get some jolts, but—look out there."

This warning was too late, and only a quick snatch of Matthew's arm which brought her tight against his khaki coat for just a minute, kept

Nancy from losing her balance as they dipped into a rain-worn gully. When he released her and the girl looked up, she saw that all his previous confusions were as nothing compared to the embarrassment that engulfed him now. This amused sophisticated Nancy, and she said demurely:

"Thanks for saving my life! Is that another of those pleasant little thank-you-mas booming up ahead? If you'll tell me when one's approaching I'll hang on tight and save you the trouble of rescuing me a second time."

"It—it wasn't a bit of trouble," stammered Matthew. "I mean—I didn't in the least mind it—"

"I'm glad to know that the experience wasn't unpleasant," broke in Nancy, her eyes dancing. "Do I get out here?" (As Matt, his face the color of a penny, stopped the engine.) "And do I keep straight on until I reach the top?"

"I'd better show you the way, hadn't I? That is—unless—you'd rather go alone. I—I don't want to butt in if—"

"Oh, come on," laughed Nancy. "I wasn't keen on solitude, if that's what you mean. And if you've got time to play around for an hour, nothing would please me more. Jack was vanquishing a wood pile; Cousin Columbine was napping, and Aurora was too much inclined to give advice, so I ran away."

Matthew laughed softly. It was a pleasant laugh, and his voice was pleasant too, thought Nancy, when he forgot himself and spoke naturally.

"Aurora Tubbs strikes me completely dumb," he told her; "and advice is one of her strong points. She's never recovered from my going to college—thinks it was the last word in foolishness. What's she found to pick at about you?"

"Stockings!" said Nancy, and wondered if Matt, following close behind in the narrow path, was blushing again. "My sport hose got left at home, and she inspired me to borrow a pair of Cousin Columbine's 'black cottages.' Honestly, I didn't know till I saw Cousin Columbine the day we came, that cotton stockings were manufactured any more."

"They're growing scarcer all the time," said Matthew gravely. "Even in Pine Ridge there's not much call for 'em; and the high lace boot is doomed."

Nancy whirled about. This was the strangest young man she had ever come across. One moment he stammered with confusion, and the next was saying something as amusing as it was unexpected. Their eyes met as she turned, and they both laughed, and laughing, felt better acquainted.

"I wonder," remarked the girl as she started forward, "where Cousin Columbine gets her socks?"

"You mean the boots?"

Nancy nodded because the trail was steeper here, and she found herself a little short of breath.

"Don't be Victorian," said Nancy, without turning. "Was I going too fast?"

"Too fast for your own good, at this altitude. It takes time to get acclimated when you're transplanted from sea level. Has your brother found a job?"

"Yes; yet; and he's pretty worried. Oh, just look at the Peak! And—"

and—why I never imagined such a view. I didn't know there was anything like it in the world!"

Matt beamed, as pleased with her enthusiasm as if he were responsible for the view himself.

"Keep on," he told her, "till you reach that old pine that's been struck by lightning. That tree's practically on the summit; and there isn't a finer view for miles."

"How could there be?" Nancy stood, breathless at the foot of the ancient tree. Plains, and mesas, and mountains lay stretched before her—behind her—on every side; valleys that would be green as emeralds in summer; deep gorges; snow-capped peaks. "It's almost too beautiful to be true," she said at last. "Why has no one ever built a home, here on this spot?"

Matt tapped the scarred old tree trunk, shaved clear of bark where lightning had done its work. "A house would be too good a target! This is the highest point in several miles. If you afraid of thunder showers? Are you, you'd bet—"

ITCHING TORTURE Stopped Instantly

(To Be Continued)

Talking About House-Flies

—Do You Know This?

Doctors And Scientists Realize Danger To Human Life Caused By This Pest

A common house-fly has four black stripes on its back. It has large eyes, short feelers and one pair of wings. It has two small, round balancers, borne on slender stalks, which also act as organs of hearing. A house-fly cannot bite. Its mouth is spread out for sucking. It has to suck a hard object, like a grain of sugar, with saliva from its own mouth before it can suck it up.

It breeds in heaps of filth and waste and carries disease germs on its hairy legs. It lays one hundred to two hundred eggs in one batch which hatch into maggots in twenty-four hours and after five days become the pupae. This refers to the in-between stage after they are maggots and before they are adult flies.

Is it any wonder that doctors, scientists, health authorities who realize the danger to human life which is carried around by this deadly pest, urge its extermination by every possible means. Infant Diarrhea, which causes the death of so many little children during the summer months, has been directly traced to the common house-fly.

Cleaning up unsanitary, fly-breeding places around the house, keeping food and drink covered and cupboard doors closed, using screens on doors and windows will all help, but one of the safest, cleanest, surest, easiest methods of killing all the flies is to use Wilson's Fly Pads, for an hour or two daily during the warm weather. They'll keep you free of the disgusting pests. Isn't it worth a little thought for the children's sake?

Onoway's Sports Day, Thursday, Aug. 1, 1935

Races of All Kinds,
Baseball Tournament,
Basketball Tourney,
Dancing in Evening!

SPORTING NOTES OF LOCAL INTEREST

Stony's baseballers played up at Onoway on the 17th, and had good luck, winning by a score of 8 to 7. The feature of this game was Bill Miller's two home runs in succession. Onoway's pitcher had heard Bill was new at hard ball and threw him a few easy ones, of which Bill took advantage. And now Bill's friends think he's entitled to a pair of ripplesheen shirts. P. Enders p; Hy Staub c. H. Bennett Ref.

Stony went to Brightbank on Friday and took part in a very interesting ball game, with a low score. Ph. Enders p; C. Street catcher. Stony got the short end of a 3-2 score owing to the fumbles of a few players out of practice. Stony plays Centrals this week on local grounds.

At the basketball game on the local courts, Friday, between Centrals and S.P. Hi. girls, the score was: Centrals 21, S.P. Hi. girls 14. There was a good crowd of spectators. Ph. Enders Ref.

The basketball contest on Monday between W-L and Stony Plain resulted in a win for the latter by a score of 23 to 11. Ph. Enders Ref.

Had Two Blowouts.

Mr. J. A. Reid, the well-known organizer for the Social Credit Party, while on his way Friday night to keep an engagement at Hansen's Corner had the misfortune to have two of his tires blow out. The second blowout occurred a short distance east of Stony, and Mr. Reid walked in here, where a new tire was procured, and he was able to continue his journey. He arrived at the Hansen Hall long past the schedule time, but the large crowd at the hall were sure pleased to have him come, and tell the farmers again of the great benefits which Leader Abernethy's New Deal will bring them. The Social Credit doctrine has made great strides here, and the people are anxious to hear more about it. Members of the Group hope to have the district 100 p.o. by Aug. 22nd.

Wheat Board Wheat 50c. Bu.

A first payment of 50c a bu. on No 1 Northern on the farm, or 70c at the head of the Lakes, by the Canada Wheat Board, has been suggested at Ottawa. The Board will probably take over Sept. 1st. The visible supply of Canadian wheat on July 17 was approximately 200 million bu., but is expected to be less by July 31, end of the crop year.

HY. SCHELLENBERGER WINS A GOLD MEDAL.

Among the local farmers who have won various prizes with their exhibits at the Edmonton Exhibition is Mr. Hy Schellenberger, who farms 3 miles east of Stony Plain. Mr. Schellenberger was a major winner in the grain classes. He secured 5 first prizes and other places. His entries took first in Marquis wheat, 6-rowed barley, 2-rowed barley, timothy seed and spring wheat in sheaves.

On Friday the Edmonton Clearing House Association Trophy for the aggregate on seed grain exhibits at this exhibition was awarded to Mr. Schellenberger. With it went a gold medal for the holder of the trophy. This is the first occasion on which Mr. Schellenberger has won the Cup since it was offered for competition five years ago.

On the Side.

To decide a wager, The Sun has been asked for the correct date of the last Provincial and Federal electoral contests. The 1930 election for the Legislative Assembly was held on the 19th June. The election for the House of Commons occurred on July 28.

—Someone's always taking the joy out of life—just as the golfing season gets again going we read in the papers that people who stand in an open field or golf course during a thunder storm are much more likely to be struck by lightning than those who keep close to trees.

—A recent case which was brought to the attention of the Board sitting under the Farmers' Creditors' Arrangement Act of Saskatchewan, showed that a Kindersley farmer had shipped a cow to the Winnipeg market, and after all charges had been paid, received a check for twenty-five cents, with an exchange charge on this check for thirty-five cents.

—Mabel says if we all could do as we please when the heck would wash the dishes?

—Young chaps getting a Spring outfit on deferred payments sometimes have bad luck. Here's Willie Reid, living across the line, was noticed hurrying home the other evening minus most of his wearing apparel. Willie missed a few payments, so the collectors captured Willie on the street and repossessed the suit.

—Overheard at bridge: My husband is one of the helpless kind—I always have to thread the needle when he sews on a button.

—The "Anti-Gossip Society" has been launched in Uxbridge, down in old Ontario; organized for the express purpose of stamping out "insidious whisperings, back-fence chatter, and bridge-table innuendoes which ruins men's reputations and women's fair names." The story is, it has been launched by "a group of business and professional men."
